Your startup maturity determines how we assess your team during IT Due Diligence.

Churning (Startup)
Pivoting constantly on primitive, insecure tech. We're assessing if there's method to your madness.

Learning (Scale-up)
Close to Product Market Fit. We'll be checking the team's ability to learn how to mature personal skills and their tech platforms.

Earning (Mature)
Mature governance and processes are needed to scale, robust and secure tech.
